Tattoo Aftercare *and tips*

Basic Aftercare Tips

1 Remove bandage within a few hours and wash with warm water and soap. Pat dry with a clean paper towel and apply a thin layer of A&D or similar. Remove any excess with a clean, dry paper towel.

2 Wash tattoo twice daily while healing and use A&D as needed to prevent dryness. It is fine to wash in the shower or tub, but do not allow the area to soak.

3 Do not pick or scratch any scabbing, allow it to come off on its own. Scabbing usually flakes off in 7-10 days. Keep clean and continue to use A&D or fragrance-free lotion until healed. Wear clean, loose clothing to protect tattoo while healing.

4 DO NOT expose healing tattoo to direct sun, swimming or public water, hot tub, unclean conditions, irritating clothing, or anything else that may hinder healing.

5 Once tattoo is healed, use high SPF sunblock when exposed to direct sunlight.
